Compare three pest control quotes

Use the same confirmed pest, property and requested work. Blank means unanswered - not included.

Pest / evidence and rooms or structures being compared

Date / quote references

Compare the same scope	Provider A	Provider B	Provider C
Business name / contact / quote date			
Pest identified and evidence supporting treatment			
Rooms, structures or belongings covered			
Areas and tasks excluded			
Methods and products; nonchemical work			
Preparation: who does it and any added fee			
Removal, exclusion, cleanup and repairs - itemize			
Follow-up visits, monitoring and callback terms			
Relevant credentials / where verified			
Warranty duration, conditions and repair coverage			

Before comparing price: Resolve differences in pest identification, access, rooms covered and follow-up. Ask each provider to clarify unanswered items. A cheaper quote may describe a smaller job.

Free to print and share unchanged with credit. Version 1.0 | October 24, 2026

Compare the full first-year cost

Write quoted amounts only. This worksheet contains no advertised offers or measured local prices.

Cost or contract item	Provider A	Provider B	Provider C
A. Initial fee (include any mandatory inspection fee once)			
B. Amount of each additional recurring payment			
C. Number of additional payments in the first 12 months			
D. Recurring subtotal = B x C			
E. Required extras not already counted in A or B			
F. Applicable taxes not already included above			
First-year total = A + D + E + F			
Renewal price / what happens after year one			
Minimum term / cancellation fee and conditions			

Avoid double-counting: Count payments, not visits. If the initial fee includes the first visit, do not count it again. For one-time work with no recurring payments, enter 0 for B and C. Ask whether optional repairs are part of the work you actually want to compare.

Decision note: Which scope best addresses the evidence, and what still needs clarification? _____
